

Flame Retardant Workshop

If you would like to be notified as to when our next Workshop will be, please sign up here:

Where: 28298 Constellation Rd. Valencia 91355
This two day Workshop is beneficial for those who want to learn about flame-retardant application, testing, state, national & local fire code compliance, documentation, certification, liability & how to plan purchases for materials. Tents and structural fire codes will not be discussed during this session. All attendees will participate in hands-on application and in-house testing. Confidentiality Agreement & Questionnaire Required

If you have any questions, please call Firetect, Inc.
661-295-3473
Or email Kathy@Firetect.com.

The Instructor for this Workshop is Kathleen Newman, (Kathy). With over 25 years of flame retardant experience, she is a recognized leader in the flame retardant industry. Kathy is on the Technical Committee of the Office of the CA State Fire Marshal, Ca Department of Consumer Affairs and Testing Committee for the National Fire Protection Association. She is a Certified Licensed Applicator for the State of California and City of New York. Kathleen has worked with many prominent, companies who find this workshop very informative. They are able to share a clear understanding of what flame and fire retardants can do to increase life and property safety as well as the limitations that flame-retardants have. Attendees are able to use this information to enhance policies, procedures and safety within their company and feel confident about working with Fire Retardants. This Workshop does not take the place of taking the test to become a CA Certified Applicator; however, it is a great enhancement to the Office of the State Fire Marshal Flame Retardant Program.
